Let your teaching talent shine bright

Virtual Patients in your curriculum

Real time feedback

Based on the physiological algorithm patients immediately react to user's actions

Tailored to suit your needs

editing scenario tool to make it fully appropriate to your learning objectives and curriculum strategy

Increasing complexity

Expert-reviewed scenarios with several degrees of difficulty

Multiplayer

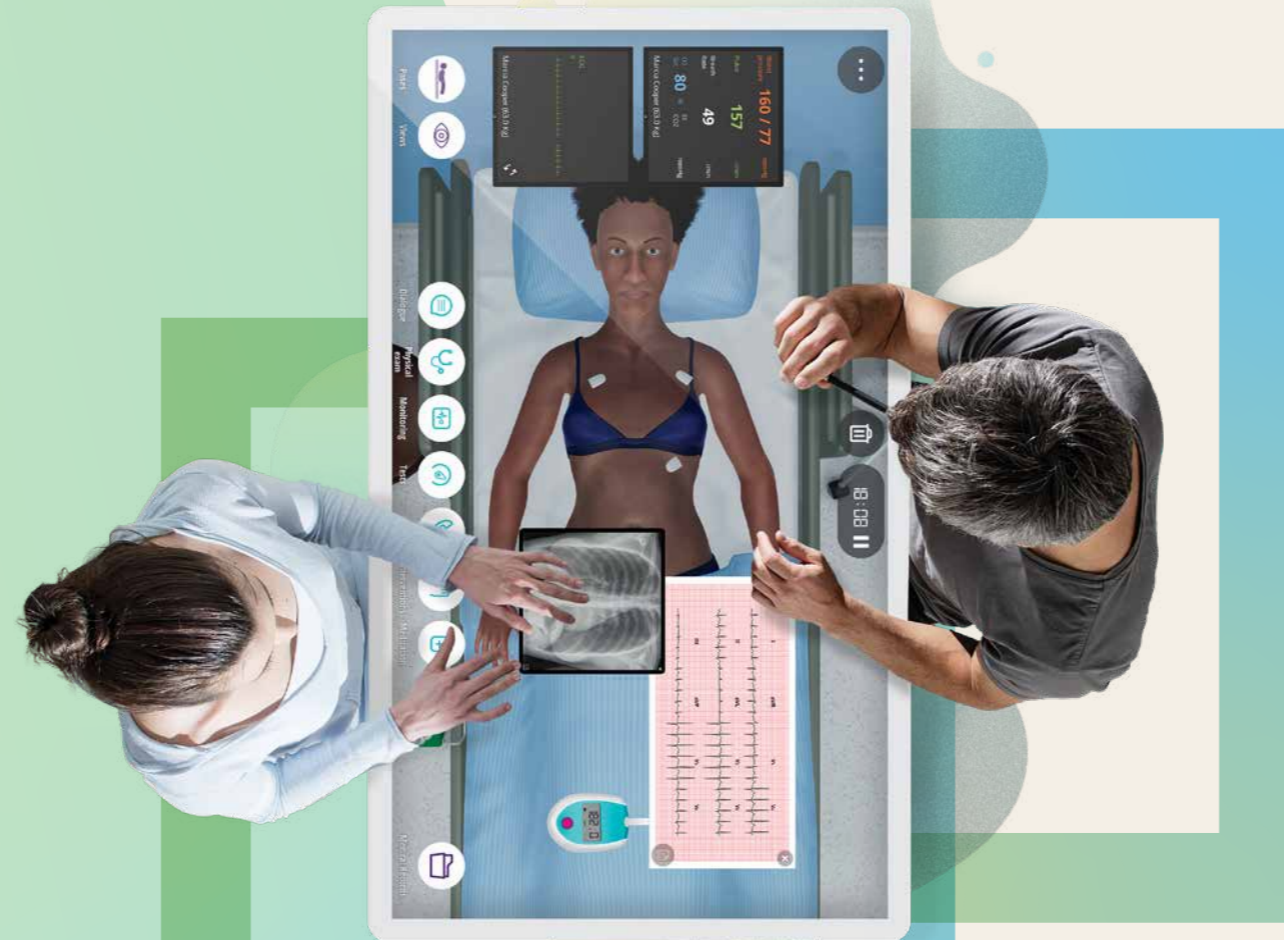

Collaborative interaction to enable team-based learning, interdisciplinary and interprofessional teamwork

Multi-language

English, Spanish, French, Portuguese, Chinese, Russian, Turkish and Japanese

Cloud based and multi-platform

Ready for in-person, online and hybrid learning

bodyinteract.com

How does it work?

Enhance your learners' clinical reasoning and decision-making skills, boost their confidence and promote teamwork.

- Practice medical history taking through interactive **dialogues**
- Monitor the patient's **vital signs**
- Perform a complete ABCDE assessment with 80+ **Physical Exam actions**
- Complete your diagnosis by ordering from 290+ **complementary tests**
- Conduct 200+ **interventions**
- Administer or prescribe **medication** from a list of 600+ drugs

Debriefing

Analyze and synthesize actions and thought processes with extended performance reports after each simulation. Provide constructive feedback, enable self-reflection and assess learning gaps. **Our built-in Learning Management System will help you.**
